

Turner

NYC DOB is the most proactive regulatory agency for construction oversight. Understanding the complexities of using cranes in NYC's dense urban environment is challenging alone and keeping up with the City requirements can be overwhelming. The Cranes and Derricks Workshop is an assembly of crane and rigging experts who have dedicated their careers to improving the construction industry and through this Workshop are sharing their wealth of knowledge. The Seminar is thorough, engaging and an invaluable session for anyone who is using cranes. The instructors make a complicated and difficult subject easy to follow. Turner is sincerely grateful to the Workshop group and highly recommends this training. A special thanks to Jim and Larry.

"The CnD Workshop provides insight into decades of experience shared by the industries foremost experts in the field. The team behind CnD provides an invaluable service that will exponentially benefit our industry as their outreach program is extended and their lessons are implemented. JOB WELL DONE!"

"The CnD Workshop is excellent. All Superintendents, Project Managers and Executives were very impressed by this level of content and detail. It's a great class and we have already booked our fifth seminar."

"The training we received was invaluable and relevant for our teams. The presenters were clearly Subject Matter Experts willing to share their wealth of knowledge and insights based on their decades of industry experience. We highly recommend this training for organizations committed to education, compliance and safety."

"Once again, thank you for your time and effort preparing and presenting a Crane Workshop at Caldwell Wingate. The fact that we asked you back speaks volumes to the value with which we hold your expertise. Coupling experience and knowledge with presentation skills makes for an attentive audience and good material retention. Be assured that you have left a favorable impression on us, which we will be pleased to share with others as the opportunities arise."

"High level summary, very well received. Look forward to future collaborations. A real success by all accounts."

"Undoubtedly a thorough appraisal of the regulatory complexities and compliance protocols. Timely and impressive."

"A significant contribution to our industry."

"Job well done. A giant success."

"Long in coming. Exactly what we were searching for. Job well done. Look forward to the future development of your website. Outstanding presentation!"

"Highly recommend it. Unanimous support of our PM's and Supers. Very well done!"

"Brilliant! The New York City Cranes & Derricks Workshop is highly recommended for a better understanding of the complex and often misunderstood regulatory requirements in New York City."

"Tremendous work, first of its kind and long overdue, 360 degree approach. Outstandingly presented, technically concise and very well received. Great Workshop for a Great City."

“Thank you to the Workshop for the outstanding presentation last week at our Plainview office. Every presenter provided invaluable expertise that will undoubtedly help elevate both our EW Howell employees, as well as our subcontractors. It often seems that Cranes & Derricks regulations within New York City are in a constant state of flux. The Workshop helps shed light on these often misunderstood Rules/Regulations and help better us as an organization.”

“Thank you, a tremendous amount of information pushed into two hours. Tremendous opportunity for our PM’s and Supers. Vital to our success and professional development.”

“Invaluable resource to the industry. It’s about time!”

“The correct focus on the regulatory and safety aspects of the process. Much appreciated.”

“Complex topic, great presentation. See you next year.”

The Cranes & Derricks Workshop is the only program of its kind, detailing the regulatory maze of the NYC DOB. Larry, Matt, and Jim (along with industry advocates) have dedicated a significant amount of time and energy in developing a clean, crisp, and concise program that leaves the audience with a thorough knowledge of NYC Cranes and Derricks requirements. AGCNYS represents the leading GC/CM firms in New York City, and we proudly endorse this program as “must attend” for NYC contractors. Well done!
